

6

1966

- Oct 21 Tom & Mary Cragg. Cirrus until $\sim 8^{\circ}$ PM.
Observed rest of night; Seeing 2-3, Tr 4-6
1. Approach of Dione to Saturn - eclipse split after Saturn set.
 2. CM transit of bright oval in STB on Jupiter
 3. Able to reach to around 16 because of seeing & gibbous moon (1st half only).
Got a total of 74 estimates, 49 of which were sanctioned
- OCT 22 Bonnhorst & Marriott -

1967

Feb 18-19

- Tom & Mary Cragg & Joe Dolny
Occasional light cirrus + SW breeze
Temp from 42° - 36° during night
Seeing 4-5 at start dropping to 1-2 by dawn
1. Photography of moon & Jupiter
 2. Visual variable star work (40 est, 21 sanctioned)
Faintest estimate was 16.3 on V476 Cyg
- Dome quite stiff to get started but after a rotation or two it worked fine.
Moon seriously interfered until it set around 1° AM.

MAY 13
