## Variable Stars: New Frontiers

**86th Spring Meeting of the AAVSO Sion–St. Luc, Switzerland, May 26–31, 1997**

## Table of Contents

Group Photograph ii

Preface
J. A. Mattei, M. Grenon 8

Welcoming Address
S. Berthet 10

Address to AAVSO Participants
M. Delaloye 12

Acknowledgements 13

Meeting Hosts, Local Organizing Committee, Scientific Organizing Committee, and Meeting Co-Sponsors 14

List of Participants 15

**Part 1. Mapping the Sky: Variable Objects from Sky Surveys**

The Impact of Ground-Based Monitoring by Variable Star Observers *(Abstract)*
J. A. Mattei 18

The HIPPARCOS Mission—A New Era for Variable Star Astronomy *(Abstract)*
M. Grenon, L. Eyer 18

Long-Term High-Precision Monitoring of Variable Stars
G. Burki 19

The Massive Variable Star Returns From the Search for MACHOs *(Abstract)*
K. H. Cook 29

Some EROS Survey Results for Variable Stars in the Magellenic Clouds
J. P. Beaulieu, R. Ferlet, J. B. Marquette, A. Vidal-Madjar 30

In Quest of Variable Stars With Near-Infrared Surveys *(Abstract)*
N. Epchtein 32

The Impact on Interactive Binary Research: 18.5 Years of Space Observations With the IUE Satellite *(Abstract)*
R. Viotti, D. de Martino, B. T. Gänsicke, R. González-Riestra 32

X-Ray Observations in the AXAF Era and NASA's Public Outreach Plans *(Abstract)*
F. R. Harnden, Jr. 33

Interferometric Surveys and Results on Variable Stars: Now and in the Future
M. Karovska 34

Supernova Searches
P. M. Garnavich 42

Discovering Supernovae Using a CCD Camera *(Abstract)*
M. Armstrong 48

Robotic Telescopes on the Internet and the Study of Variable Stars *(Abstract)*
J. Baruch 48

The Three-Reflection, Two-Mirror Telescope (TRT): A Compact Instrument for Wide Field Astronomy *(Abstract)*
M. Amoretti, M. Badiali, C. La Padula, D. Nanni, A. Preite-Martinez, A. Vignato, R. Viotti 49

Stellar Spectra and the "Virtual Observatory" Project
R. E. Griffin 50

*Table of Contents continued on following pages*

**Part 2. The Status of Stellar Variability**

**Section 2A. Pulsating Stars**

Overview of Stellar Pulsations and Driving Mechanisms in Relation to the Evolution of Stars *(Abstract)*
A. Maeder 58

Pulsating B Stars Discovered by HIPPARCOS *(Abstract)*
C. Aerts, C. Waelkens, P. De Cat, K. Kolenberg, E. Kestens, M. Grenon, L. Eyer 58

Stellar Variability in the Lower Part of the Classical Instability Strip *(Abstract)*
E. Poretti, F. Musazzi 59

CCD Light Curves for Unstudied RR Lyrae Variables in the Core of M5 *(Abstract)*
V. Ripepi 59

New CCD Photometry of RR Lyrae Stars in NGC 3201 *(Abstract)*
A. Piersimoni, V. Ripepi 60

A High-Speed Photometric Survey of Normal and Peculiar A-Type Stars *(Abstract)*
O. M. Kurtanidze, M. G. Nikolashvili 60

New Insights Into the S Doradus Phenomenon and the Micro-Variations of Eight Luminous Blue Variables *(Abstract)*
M. de Groot, A. M. van Genderen, C. Sterken 60

Comparison of Visual and Photoelectric Photometry for Bright Cepheids *(Abstract)*
G. Foster, W. M. Lowder, E. J. Oravec 61

Linear Polarimetric Variations of RV Tauri Stars *(Abstract)*
K. Yoshioka, K. Saijo, H. Sato 61

What Makes a Star Act Like a Mira?—and Other Conclusions From Dynamical Atmosphere Models
L. A. Willson 62

Ground-Based and ISO Observations of Semiregular and Mira Variables
J. Hron 72

Pulsation Modes and Fundamental Parameters of Mira Stars *(Abstract)*
D. Barthès 81

Four Neglected Southern Mira Stars *(Abstract)*
T. A. Cragg 81

R Centauri, an Interesting Southern Variable
J. R. García, S. A. Dominguez 82

Statistical Period Analysis of Mira Type Variables *(Abstract)*
H. Sato, K. Saijo, K. Yoshioka, J. A. Mattei 84

Correlations Between Characteristics of Mean Light Curves of Long Period Variables
I. L. Andronov, L. S. Kudashkina 85

Period Analysis of the Light Curves of Three Semiregular Variables: AA Cygni, U Delphini, and RX Bootis
J. Speil 88

Microvariability of Red Giant Stars
N. Mowlavi, A. Jorissen 91

The First Radial Velocity Curve for CK Camelopardalis *(Abstract)*
N. A. Gorynya, N. N. Samus 97

**Section 2B. Cataclysmic Variables**

Cataclysmic Variables: From Radio to Gamma-Rays
B. Warner 98

New Insights on Cataclysmic Variables From HST Spectroscopy
E. M. Sion 107

The EUVE Dwarf Novae Project *(Abstract)*
C. W. Mauche, J. A. Mattei 123

*Table of Contents continued on following pages*

Unsolved Problems in the Evolution of Interacting Binary Stars
R. F. Webbink 124

Backyard Research on Cataclysmic Variables by a Consortium of Professional and Amateur Astronomers: DV UMa—A Case Study
T. Vanmunster 132

The RXTE, ROSAT, IUE, EUVE, Optical Campaign Covering the 45-day Supercycle of V1159 Orionis *(Abstract)*
P. Szkody, K. Honeycutt, J. Robertson, A. Silber, D. W. Hoard, L. Pastwick, I. Hubeny, J. Cannizzo, W. Liller, R. Zissell, G. Walker, C. la Dous, J. Drew 135

High Resolution Time-resolved UCLES Spectroscopy of AE Aqr: I. The Secondary Star Revealed *(Abstract)*
J. Echevarria, F. Diego, D. Mills, R. C. Smith 136

The Characteristics of the Cool Component of the Cataclysmic Variable AE Aquarii From HIPPARCOS Observations
M. Friedjung 137

Parameters of the Dwarf Nova SS Cygni Obtained From *UBV* Photoelectric Light Curve Analysis
I. Voloshina, T. Khruzina 141

Statistical Analyses of the AAVSO Light Curves of Z Camelopardalis and AH Herculis *(Abstract)*
T. Ak, M. T. Özkan 144

Recent CCD-Image Observations of RW Ursae Minoris
H. H. Esenoğlu, M. T. Özkan 145

The UV Luminosity of Z Cam Type Dwarf Novae *(Abstract)*
M. T. Özkan, H. Gülseçen, H. H. Esenoğlu, T. Ak, A. T. Saygaç 148

Analysis of AAVSO Records of the Star Z Camelopardalis *(Abstract)*
B. D. Oppenheimer, J. A. Mattei, S. Kenyon 148

Polars, a Growing Family
B. T. Gänsicke, K. Beuerman, J. A. Mattei 149

Photometric Observations of Four Old Novae for Timescales From Decades to Minutes *(Abstract)*
S. Yu. Shugarov, E. P. Pavlenko 152

The Variability of Stars—Supernovae Precursors
O. A. Tsiopa 153

A Catalogue of X-Ray Binaries *(Abstract)*
O. Guseinov, A. T. Saygaç, A. Allakhverdiyev, H. Çalışkan 158

Information About New Books on Highly Evolved Close Binary Stars *(Abstract)*
A. M. Cherepashchuk, N. A. Katysheva, T. S. Khruzina, S. Yu. Shugarov 158

**Section 2C. Symbiotic Stars**

Variability and Orbital Parameters for Symbiotic Stars
H. M. Schmid 159

The Light Curves of Classical Symbiotic Stars
A. Skopal 163

The Photometry of Four Symbiotic Stars: UV Aur, TX CVn, BF Cyg, and V1016 Cyg for the Last 100 Years *(Abstract)*
S. Yu. Shugarov, O. A. Ul'janikhina 168

Far-Ultraviolet Spectroscopy of Symbiotic Stars
H. M. Schmid, I. Appenzeller, J. Krautter, H. Mandel, J. Barnstedt, M., Gölz, M. Grewing, W. Gringel, C. Haas, W. Hopfensitz, N. Kappelmann, G. Krämer 169

HIPPARCOS Astrometric Observations of Symbiotic Stars *(Abstract)*
A. Emanuele, R. Viotti, D. Cardini, M. Badiali 172

The Ultraviolet History of the Outbursting Symbiotic Stars Z Andromedae and AG Draconis *(Abstract)*
R. González-Riestra, R. Viotti, J. Greiner, T. Iijima, M. Maesano, J. A. Mattei, F. Montagni 172

Periodic and Aperiodic Variability of Symbiotic Stars *(Abstract)*
L. L. Chinarova 173

*Table of Contents continued on following pages*

**Section 2D. Other Binary Systems**

Light Curve Solution for Early-Type Binary Systems With Radiative Interaction
H. Drechsel 174

Classification of Fine Effects in the Light Curves of Eclipsing Binary Stars *(Abstract)*
I. Kudzej 177

On the Feasibility of Using Eclipsing Binary Timings as Probes for Extrasolar Planets
R. D. Benge, Jr. 178

Determining the Period of the Eclipsing Binary: DHK41 *(Abstract)*
D. H. Kaiser, G. Frey 180

Database of Times of Minima for Eclipsing Binaries as Part of a General Multiple Stars Database *(Abstract)*
M. Kurpińska-Winiarska 180

Observational Evidence for a Third Body in AS Camelopardalis *(Abstract)*
V. S. Kozyreva, A. I. Zakharov 181

An Unusual Brightening of the Eclipsing Binary RZ Cassiopeiae
W. M. Lowder 182

How to Improve Reliability of Visual Data of Eclipsing Binaries *(Abstract)*
J. Šilhán 184

Light Curves of Some Chromospherically Active Binary Stars *(Abstract)*
G. Taş, E. Işık, S. Evren, Z. Tunca 184

Eccentric Eclipsing Binaries: Tests of General Relativity
M. Wolf, L. Šarounová 185

Now Is the Time to Revisit V725 Sagittarii
A. Wehlau, T. Atcheson, S. Demers 187

**Section 2E. Other Variable Sources and Data Analysis**

Photoelectric Photometry of Two Chromospherically Active Stars: HD 29697 (=V834 Tauri) and HD 82443
E. Işık, G. Taş, S. Evren, Z. Tunca 190

Flare Star Research—A New Field of Astronomy for Photometrists Observing With CCD Cameras
G. Szécsényi-Nagy 194

Monitoring Blazars at Abastumani Observatory *(Abstract)*
O. M. Kurtanidze, M. G. Nikolashvili 197

Thoughts on a Database of Light Curve Extrema of Periodic Variable Stars *(Abstract)*
M. Zejda 197

"Asymptotic Parabola" Fit for Light Curves
I. L. Andronov, V. I. Marsakova 198

Non-Parametric Methods for Periodogram Analysis: Test Function Interrelations and Properties
I. L. Andronov, L. L. Chinarova 201

Time Series Analysis of Amateur Observations: Various Methods and Some Results
I. L. Andronov 204

**Part 3. Reports From Institutions and Groups**

The *General Catalogue of Variable Stars* in a Changing World *(Abstract)*
N. N. Samus 206

The AAVSO and Its Activities *(Abstract)*
J. A. Mattei 206

Observing Down Under *(Abstract)*
F. M. Bateson, A. F. Jones 207

Present Activities of the Hungarian Astronomical Association-Variable Star Section (HAA-VSS) *(Abstract)*
L. L. Kiss 207

*Table of Contents continued on following pages*

Variable Star Observing in Latin America: Past and Future *(Abstract)*
J. R. García 208

AFOEV Report *(Abstract)*
J. Gunther 208

Variables Down South *(Abstract)*
M. D. Overbeek 208

Report of the Bundesdeutsche Arbeitsgemeinschaft für Veränderliche Sterne (BAV)
W. Quester 209

Ten Years of VSOLJ *(Abstract)*
K. Saijo, S. Sakuma 210

The Brno Regional Network of Observers (B.R.N.O.)—Variable Star Section of the Czech Astronomical Society—and Its Activities
M. Zejda 211

The François-Xavier Bagnoud Observatory
G. Meynet, M. Grenon, J. -C. Pont, R. Arnold, J. Breguet, R. Durussel, J. -M. Gremaud, M. Henzen, E. Maeder, Y. Revaz, F. Taugwalder, F. Zuber 214

Project *Jelly-Fish*: Observations of Semiregular Variable Stars *(Abstract)*
P. Hajek 222

Astronomical Activities in Lithuania
A. Kučinskas 223

Photoelectric Photometry At Szeged Observatory *(Abstract)*
L. L. Kiss, G. Kaszás 226

Photoelectric Photometry With a Small Automatic Telescope *(Abstract)*
E. N. Walker, M. S. Gough, R. D. Pickard 226

PICA Project—a Short Description *(Abstract)*
J. Mánek 226

Observations of Some Unique Variable Stars At the Crimean Astrophysical Observatory
E. P. Pavlenko 227

V403 Cygni, BF Canis Minoris, and EG Cancri: Recent Observations of Three Variable Stars Discovered by Huruhata in Japan, Part 1 *(Abstract)*
S. Sakuma 230

Totally Eclipsed Sun Culminating Over Hungary—Meteorological Expectations for the 1999 August Event *(Abstract)*
G. Szécsényi-Nagy 230

**Part 4. Workshop on Data Collection and Distribution**

Issues on Finder Charts and Comparison Star Sequences *(Abstract)*
W. M. Lowder, J. A. Mattei 231

Is the *Guide Star Catalog* Usable for Making Variable Star Estimates?
J. Gunther 232

CCDV, What Is It?
R. E. Royer 234

Issues on Data Distribution *(Abstract)*
J. A. Mattei 236

Issues and Strategies for the Future
A. V. Holm 237

**Part 5. Workshop on Astronomy Education**

Preamble
M. Grenon, J. A. Mattei 245

*Table of Contents continued on following page*

Teaching Astronomy: Why and How?
J. R. Percy 248

The European Association for Astronomy Education *(Abstract)*
M. Reichen 255

New Practical Astronomy Activities in French Education *(Abstract)*
J. Ripert, J. Sert 255

The "Astronomy On-Line" Project *(Abstract)*
R. M. West 256

Contributions of Amateur Astronomy to Education
M. Motta 257

AAVSO Education Project—*Hands-On Astrophysics (Abstract)*
J. A. Mattei, J. R. Percy 260

The Stars for All—Géospace: an Interface Between Astronomy and Its Popularization *(Abstract)*
B. Pellequer 260

Classroom Astronomy Via Remotely-Controlled Telescopes *(Abstract)*
B. S. Duff 261

The High-Energy Astrophysics Learning Center—and More!
L. A. Whitlock 262

Hands-On Activities for the Classroom *(Abstract)*
D. L. Young 266

Introducing Variable Stars Without Using Sophisticated Technology
M. Kohl 267

Astronomy Education in Greece
M. Metaxa 272

A Light Pollution Laboratory Exercise for Introductory Astronomy Students
R. D. Benge, Jr., J. Vines 274

The Astronomy Laboratory Program at Collin County Community College, Plano, Texas *(Abstract)*
M. L. Broyles 276

"StarChild" Applications in a Classroom Setting
E. Truelove, J. Dejoie 277

An Introduction to Astronomy and Astrophysics for Urban High School Students
W. Wilkerson 279

The Use of 35mm Slides of Variable Stars in Astronomy Education
J. R. Percy, L. Syczak, J. A. Mattei, J. Chumack, M. Saladyga 281

Variable Star Research Projects for Outstanding Senior High School Students
J. R. Percy 284

Author Index 288
